The J. S. Earnsof B3
Cheutive Officer?
Lentral Intelligence Agency
Washington 25, D.C.

Dear E. Earman

**B**3

With the approval of Board x-mbers with whom I have discussed the situation. I am writing exain to ask what part the Central Intelligence Agency plays in the official investigation of the unidentified flying objects.

Since January 1953 I have been aware of the fact that the Central Intelligence Agency assembler a group of scientists at the Pentre examine the evidence on UVs and to decide or suggest a rough script. Several manths are I was questioned by an investing of the McClellan Subcommittie on Government Operations. During one of the several interview in which I gave the subcommittee mass of verified evidence, I told the investigator of the 1953 meeting of asientists and exgested that he ask for the copy the official report.

Later no told be that the Air Force explained that this was not Air Force document and that they would have to ask the approve the agency involved. On still another occasion the investigational that this had prevel to be the Cantral Intelligence Arand that he had been sent, a summary of the full report, which would said that he had been sent, a summary of the full report, which would said that he had been sent, a summary of the full report, which would said that he had been sent, a summary of the full report, which would said that he had been sent, a summary of the full report, which we have a summary of the full report.

Until that time, the Air Force had officially desied the exister of any such document. However, shortly after I had the verification the McClellan subcommittee investigator, the Air Force admitted that there was such a document, as I had claimed. With a short time they released what they said was a summary of the main points, and the consistence of the scientists. No mention was made of the connection with the Central Intelligence Agen.

#8

Copied Fair Morrly

vince them, requests for the full report of this group have proveduated, on the grounds that the report is classified.

Ins Marianel Investigations Consistes is hereby requesting traction of this full majort so that we may examine the discussion and the syldence along with the scientists conditions.

Inc Air Force has repeatedly clated that there is absolutely no damper connected with uniquentified flying objects. It has a unsaid that there is no classification as regards national security Ithis admitted "official use only" classification, which, the Air Force rays, is to protect the names of witnesses who do not wish to be publicly listed.

Sints the CIA document is said not to list witnesses names but to discuss the general problem, there is no reason apparent way it should not be declassified, as requested.

Dispite the published emplusions of the 1953 scientists group, we have found that there is an increasing public bolief that the WFO2 may possibly be unfriendly. We have absolubely no evanuate to prove that they are heatily and I eits this only to prove the danger of the present secrecy policy. Secrecy breeds ignorence of the subject and it could be to hysterisfor even panicular contain conditions. I believe that an open discussion of the problem would serve the best interests of the country.

In addition to requesting a copy of the formal report drawn up by the scientists in 1955, NICAP requests an interview with an official of the Central Intelligence Agency who is quilified to speak for the GIA on this subject. It is our belief that a frenk discussion of the problems will be of mutual benefit.

In my provious letters, I gave you the name of some of our Board members, including Vice Admiral R. H. Hillenkoetter, USY (Ret.) who formerly was director of the Central Intelligence Agency. I am sure that Admiral Hillenkoetter, as well as all the members of our Board and our Special Advisers would tell you, if questions that they directe with the present secrecy about unidentified flying objects.

With a membership covering all 49 states and many foreign countries except those in the USSR, NICAP has, by its serious, factual at proach wan the attention of many important citizens here and nor Our factual press releases have been given serious attention by the press and by newcasters. We are in a position to help citizens in America, and elsewhere, for the facts which eventually will to be made public. We hope the Control Intelligence Agency will agree to a conformace or at least an interview on the various expects of this problem.

Sincerely yours,

DEKIR

DONALD E. KEYHOE, Major USMI 19.
